# PEOPLE-POWERED PROGRESSIVES PLATFORM

## **Democracy for all!**

To have a truly fair Democracy, we must end our dependency on big money and become the party of the grassroots and Civil Rights Act again!

## **Healthcare for all!**

Medicare for All is the one true dream of Democrats for generations! Let's make this the generation that does it!

## **Education is a human right!**

Our public schools and universities were once the envy of the world. We can do it again!

## **Housing is a human right!**

Our region is home to incredible wealth. No one should be living on the streets! We need innovative housing solutions!

## **Living Wages are a human right!**

Wages must stay consistent with costs of living. Basic Universal Income due to automation needs to become part of the conversation now.

## **Healthy Environment is a human right!**

There isn't any time left. We have to stop climate catastrophe now. No more empty promises!

## **Privacy is a human right!**

Do you like Facebook selling your information to marketers, or corporations tracking your views? Good, neither do we!
